ADDITIONAL INFORMATION

Projects

BBQ Dostava: Mobile app for iOS and Android for browsing and ordering food consisting of 3 applications in total (Customer app, cook & delivery guy app, admin panel app)

App Store: <https://apps.apple.com/us/app/bbq-dostava/id1465941391>

Google Play: <https://play.google.com/store/apps/details?id=com.aksifood2&hl=en>

Majstor za Pivo: React Native promotional application for one of the best pubs in Sarajevo where customers can search and filter through the menu along with prices and descriptions for each product, see upcoming events, and make reservations. This project also consists of two apps (Customer app, and admin panel app).

App Store: <https://apps.apple.com/us/app/majstor-za-pivo/id1473955739>

Google Play: <https://play.google.com/store/apps/details?id=com.majstor&hl=en>

Flexicar: Car-pooling and renting social network iOS and Android application written in React Native, developed for the Swedish market with the goal of reducing everyday CO2 emissions. This application includes various features such as BankID registration/login, posting travel plans (or travel requests), car renting, adding friends, instant messaging chat, and a review system.

(Not published yet)

Hell's Burger: React Native application for a popular Swedish restaurant which is going to be connected to infrared printers for the purpose of printing orders for the cooks, making their job more efficient. Also includes two separate apps for the customers and for the admin panel. This application uses cloud functions for sending targeted and general push notifications from the admin panel to customers.
